RE: Waiver Request for Method 9 in lieu of Method 5 for AQD #s 10, 11, 14, and 100.

Dear Dave:

The purpose of this correspondence is to request a permit waiver to conduct EPA Reference Method 9 in lieu of Method 5 for four sources permitted under MD-995 issued April 6, 2004.

Condition 8.B)i) of MD-995 states that Method 5 shall be used to determine compliance with emission limits of AQD #s 10, 11, 14, and 100. The particulate emission rates of these four sources range from 0.2 to 0.4 pph. Due to these small rates, Solvay requests a waiver to allow the use of Method 9 in lieu of Method 5 for compliance testing.

If you have any questions concerning this request, feel free to contact me at 875-7944.

Respectfully submitted,

Dolly A. Potter  
Environmental Services Supervisor
